Cheatsheet

Pixel Lights

- Set pixels to one RGB color: `(pixels 8 0 1)`
- Create an RGB color: `(defvar red (to-color 4 0 0))`
- Make pixels different colors: `(pixels red green blue pink)`

Touchpads

- Read both touchpads: `(touchpads)`
- Read 2nd touchpad: `(touchpads 2)`
- Max value of both touchpads: `(apply 'max (touchpads))`
- Test if either are touched: `(if (< 500 (apply 'max (touchpads)))`
                                      `    (do-something-cool))`

Storage

- Launch function on startup: `(save-image 'foo)`
                                      `(save-image '(lambda() 42))`
